Tool Building Capabilities

Fixtures, Gages, Fixture Changes/Updates

Inspection Services

FARO LASER TRACKER

Met South provides our customers with an "on site" tool building capability by utilizing our Laser Tracker. The laser tracker has an inspection accuracy of .001 in a 230ft measurement range.

Let us assist with your building of weld lines, assembly lines, large aircraft and automotive tooling. Our experienced operator will bring the Faro Laser Tracker to your location, saving you valuable time and shipping costs.

CNC CAPABILITIES

Vertical Milling Center is fully programmable for 3D contour machining along with running customer supplied programs.

PLASTIC LAMINATION

Plastic duplications, trim jigs, master model lay-ups, or customer specialized applications.

LASER TRACKER

Faro Laser Tracker Extreme ADM
(Absolute distance measurements)
230 ft measuring envelope. The
Laser Tracker has a built in
weather station, which allows
quick set up and temperature
acculmation for inspection start-
up. The portability of the Faro
Laser Tracker allows us to perform
onsite inspections saving time
and shipping cost. Let us assist
you with you tool building such as
large weld lines, large machine
set-ups, detail adjustments for the
aircraft and automotive industry.
